Your products *our production*

STEELPLAN PRODUCTS

LASER & PUNCHING

Lasering and punching of all sheet metals via our automated equipment.

FORMING

Multi-axis forming of complex sheet metal parts.

PRECISION PROCESSES

Numerous processes to meet the demands of our customer's requirements. For example: drilling, tapping, inserting and machining right up to coded welding and much more.

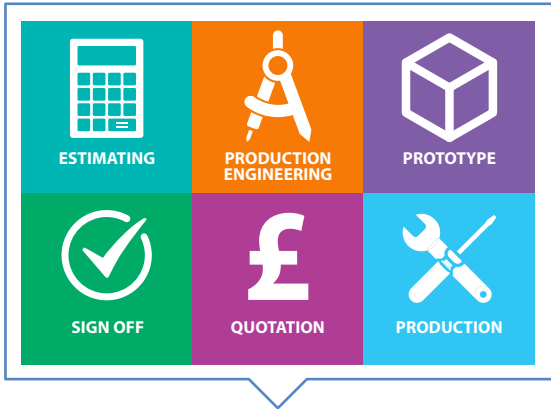

FINISHING & ASSEMBLY

All products are fully finished via our in house painting & silk screening plants. We also offer product assembly, both mechanical and electrical (including testing).

Steelplan Products, your manufacturing partner. . .

We are proud to work alongside the UK's leading product manufacturers, providing our fine limit sheet metal expertise to suit their production needs.

Blueprint Programme

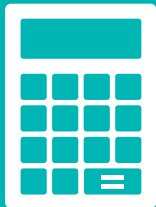

At Steelplan Products our primary goal is always to provide products and components of a very high quality coupled with first class customer service.

A perfect example of this is how we work with new customers and new products. We know what an important step it is working with a new supplier and we want to provide prospective new customers with a clear and transparent blueprint to guide them through the process. We know that every product or component we make for our clients is important so we want to invest our time, before a production run, to ensure that every aspect of manufacture is thoroughly tested and checked.

Many of our customers have appreciated the real advantages of the Blueprint Programme and have readily agreed to a small fee being made to assist in the cost of our significant investment in them, which is credited back once orders are placed.

Our **Blueprint Programme** is as follows:

1. ESTIMATING

Provision of a detailed estimate of your product, broken down into quantity price breaks, where appropriate.

2. PRODUCTION ENGINEERING

Verification of your documentation or production of detailed manufacturing drawings from concept or samples.

3. PROTOTYPE

Manufacture of a fully finished prototype.

4. SIGN OFF

We will repeat the prototype stage until you are completely satisfied and the product is approved for a production run.

5. QUOTATION

Once we have approval for the prototype we can confirm our pricing to you.

6. PRODUCTION

Orders can now be placed for full production runs.

Steelplan Products is part of the Steelplan Group.
A collection of companies that manufacture
& supply high quality British products.

OUR COMPANY VALUES

RESPECT

Respect ourselves. Respect our colleagues and the machines we work on as well as the tools we work with. If we respect all those around us then we can expect to get respect back.

IMPROVE

We should constantly strive to improve the way we do things. Think not just big, but small as well. Whilst occasionally improvement is by way of major factors (such as the introduction of new machinery or tooling), more often it is the culmination of small, little changes that get built upon, day after day. Challenge every action we do, can it be done better? No process or way of working is ever so good that it cannot be improved upon and we must vow to never stop striving to improve them.

SUPPORT

Help those around us and work together as a team. Help solve other people's problems if asked and then we will feel that we can ask them for help in return. This will build trust between us and make us a better team.

ENHANCE

Look after the environment in which we work. Strive to keep it clean and tidy, and look for ways to enhance it so that it becomes a better place to work.

We trust in this programme and believe that it is the best way for our prospective clients to take the important step of adding Steelplan Products to their list of key supply chain partners.
