FINISHING & ASSEMBLY

Your products *our production*

STEELPLAN PRODUCTS

LASER & PUNCHING

Lasering and punching of all sheet metals via our automated equipment.

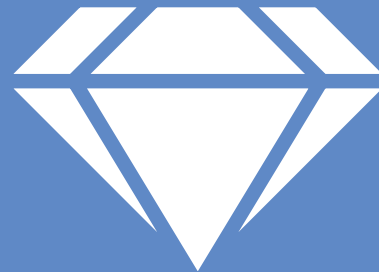

FORMING

Multi-axis forming of complex sheet metal parts.

PRECISION PROCESSES

Numerous processes to meet the demands of our customer's requirements. For example: drilling, tapping, inserting and machining right up to coded welding and much more.

FINISHING & ASSEMBLY

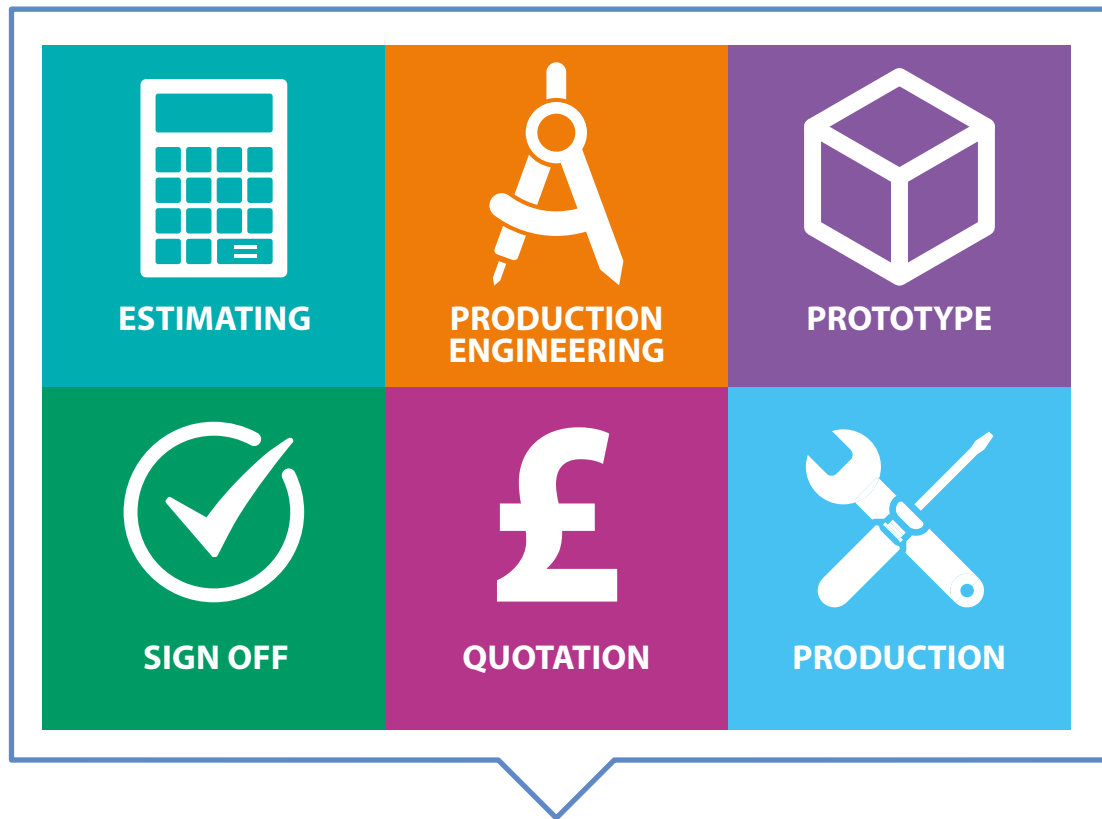

All products are fully finished via our in house painting & silk screening plants. We also offer product assembly, both mechanical and electrical (including testing).

Steelplan Products, your manufacturing partner...

We are proud to work alongside the UK's leading product manufacturers, providing our fine limit sheet metal expertise to suit their production needs.

Looking for a risk free way of trying a new supplier?

INTRODUCING THE

Blueprint Programme

Our 6 stage introduction process designed for you to trial our services with zero risk to your current supply.

We know how worrying it can be to find a new supplier, which is why we provide prospective new customers with a clear and transparent blueprint to make it easy.

Each and every one of your components is important and we want to invest our time, before a production run, to ensure that every aspect of manufacture is thoroughly tested and checked.
